SATURDAY'S MARKET

Trading Was the Largest of Any Re-

cent Week-end Session.

New York, April 22.—Heavy and persistent selling pressure was again highly effective during today's two hour session, the recess of the preceding day merely accentuating the extent of the liquidating movement.

Trading was far the largest of any recent week end, approximating 600,-

recent week end, approximating 600,900 shares, more than half of which
represented the output of the final
hour, when the list was almost without semblance of support.

The German and Mexican crises, for
as such they are regarded by the financial community, were again the
factors around which the feverish
market centered. Special stocks, that

the munitions, equipments, minor in-dustrials and oils, were steadily li-quidated, with few exceptions record-

ing lowest prices of the year. In gen-eral these issues are thirty to fifty

points under last year's best quota-

Among the weakest issues were General Motors, which fell 20 to 410, Mexican Petroleum, 10 to 39; U. S. Industrial Alcohol, 6 to 137; Crucible Steel, 7 1-2 to 75; Baldwin Locomotive 6 1-4 to 84; Studebaker 7 to 121 1-8; American Smelling 6 to 88 1-2; Texas company 5 to 180. American Car. 5

company, 5 to 180; American Car, 5 1-2 to 55, and various others of that class 3 to 5 points. U. S. Steel, which outstripped all

other stocks in volume of offerings, manifested some steadiness at first but fell back 2 to 80 as the selling

movement gathered greater momea-tum. Rails were immune for a time,

but the same cause was operative in that quarter later, the eastern lines, coalers, grangers and transcontinen-tals losing from one to two points.

General news of the day was more variable than usual, ranging from the usual optimistic reviews of mercantile conditions and enlarged bank clear-

ings to labor troubles and further con-flicting movements in foreign ex-change. Marks of the German remit-

tance moved further in favor of Ber-lin, checks to that center being quoted

at 76 1-2 against the recent rate of 75 3-4. Lires also were better, with no change in the London and Paris

In New Haven the fans are confident that Danny will turn out a team that will make the others hop some, and that city has the largest baseball representation in the history of organized baseball there. Danny has assored the fans there that he will place on

to gain any advantage in the first half mile, but at this point Pennsylvania began to forge ahead and slowly left Yale behind. At the mile Pennsylvania was leading by a quarter of a length of open water which was increased as the crew approached the finish. Pennsylvania's time was 7 minutes 30 seconds.

Yale's junior crew led the Pennsylvania juniors throughout their race. Yale's time was 7:28 2-5.

The difference in time between the varsity and junior races was due to a change in conditions. The juniors raced with a wind down the course, while the varsity race was rowed in a calm.

SPORTING NOTES.

With the rerusal of the Swedish athletic authorities to send a track and field team to this country during the coming summer, the last chance for international sport competition in 1916 has faded. As a result followers of various lines of amateur sport are turning to intersectional contests as the next best substitute and there appears to be excellent prospects in this direction. For this reason the performances of individual and group-ed athletes are being watched with far more than usual interest. This is particularly true of Pacific coast con-testants, for it is from this section that the largest invading forces are expected in the east this season.

Princeton's spring football practice will end this week with two regular games in the Stadium on Friday and Saturday. John Rush, the coach, is satisfied with the results of the prac-tice, inasmuch as it has shown a decided improvement in several respects over spring practices of previous years. The attendance has been much larger than ever before, about 100 men having reported for the work. Most of the candidates have come out regularly, and have enthusiastically foluowed the prescribed plans for practice. There has been a scrimmage or a dummy scrimmage every day in ora dummy scrimmage every day in order to give the players an opportu-nity to apply practically what they have learned of the rudiments. Many. According to that excellent naval critic, Hector C. Bywater, so far as building ways and construction plants are concerned, there is no reason why Germany could not have twenty-five battleships or battle-cruisers under construction at one and the same time. Though he admits that this figure may be astonishing, he shows that an exbe astonishing, he shows that an examination of the various yards, governmental and private, in Germany, justifies the estibate. In fact, he goes further and states that, simultaneously, a programme including goes further and states that, simultaneously, a programme including light cruisers, destroyers and submarines, could be put through, since there are many German yards which, although they cannot build capital ships, are well equipped to produce the lighter force in all these yards at 180,000 men.—Scientific American.
